Ex. No. 1	Design A Website Using HTML5
Date of Exercise	**22.07.25**
GitHub Host Link	**https://github.com/Nikilesh731/Web-Technology-Lab.git**

Aim:

To create a simple, structured HTML website for an Interior Decor E-Shop that showcases featured decor products, categories, design philosophy, and a contact form—enhancing user engagement and promoting modern home aesthetics.

Description:

The theme Interior Decor E-Shop is implemented through a clean, user-friendly HTML webpage titled Interior Elegance, featuring popular decor items like wall art, vases, lamps, and furniture. The website includes key sections such as Featured Products, Shop by Category, About Us, and Contact Form, allowing visitors to explore stylish and affordable aesthetics for their homes.

Procedure:

1 .Start HTML Structure
Use <!DOCTYPE html> and tags like <html>, <head>, and <body>. Add <meta charset>, <meta viewport>, and <title>.

2. Add Basic Styling
In the <style> tag, set a background and text color for the <body>.

3. Main Heading & Intro
Use <h1> for the store name and a <p> for a short intro.

4. Insert Product Image
Add an <img> tag with a real decor image and set its width.

5. Create Quick Links
Use <ul> with links: partner site, contact, email, and phone.

6. Add Products Table
Use <table> with <tr>, <th>, and <td> to display three items**.**

7. Contact Section
Add address, email, phone, and hours below a <h2> tag with id="contact".

8. Footer
Use <footer> for copyright.

Program:

```html
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1.0" />
  <title>Interior Decor E-Shop</title>
  <style>
    body {
      background-color: #f2f2f2;
      color: #222222;
    }
  </style>
</head>
<body>

  <h1>Interior Decor E-Shop</h1>
  <p>Style your home with our premium range of decor products.</p>
